

# Add Dahua Device via P2P into the DMSS APP

---

## Description

---

This article will cover how to add a Dahua device to DMSS via P2P

## Prerequisites

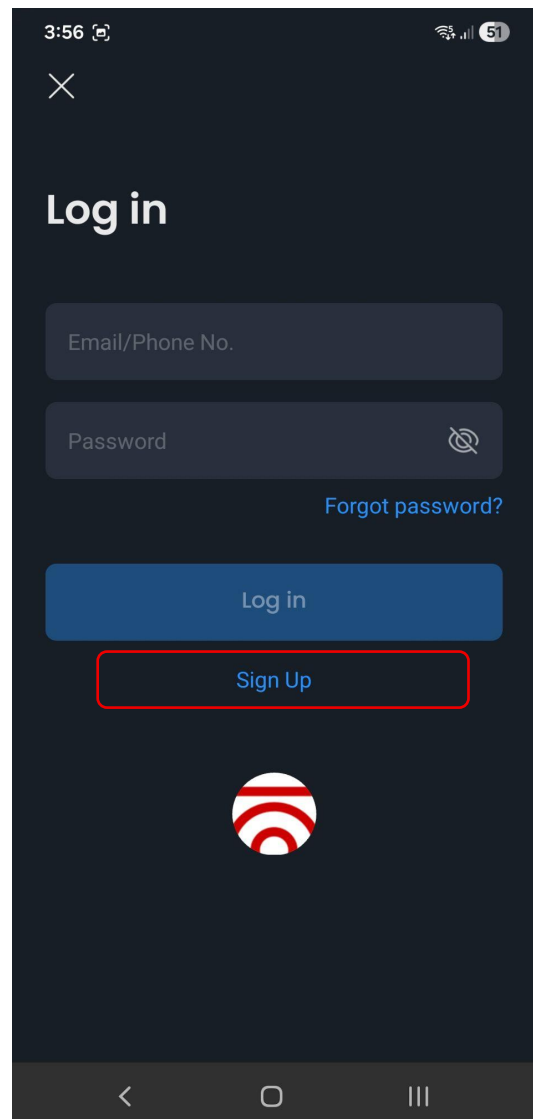

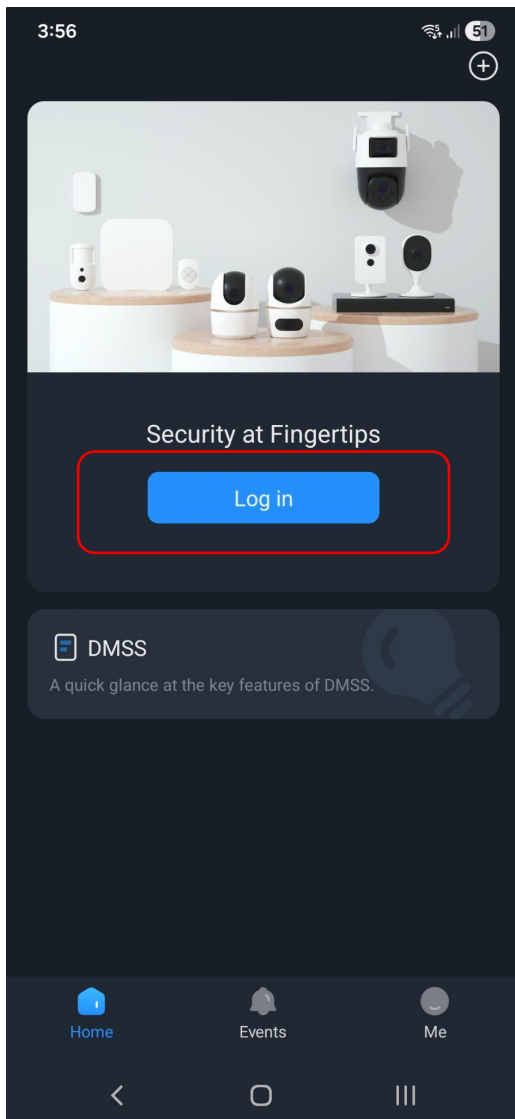

---

- Admin password for your Dahua Device
- Serial number for your device
- Stable internet connection
- [DMSS](#) Mobile App Installed

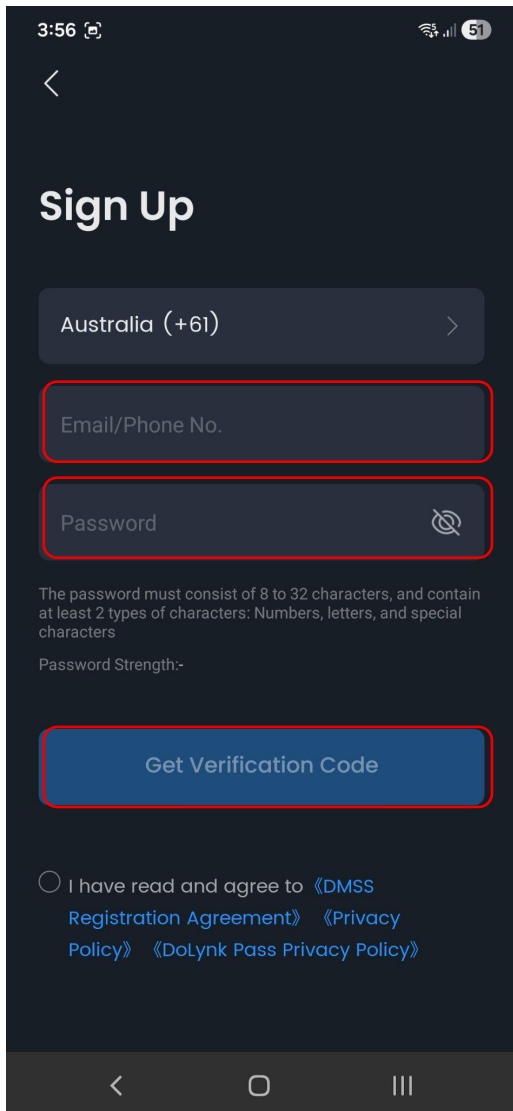

# Step by Step Instructions

---

1. Ensure your device is online and connected to the internet.
2. Once the DMSS Mobile App is installed please create a DMSS account by clicking “Log in” and then the “Sign Up” buttons. Note, if you already have created an account please log in using your existing details and skip to step 4.

3. In the sign up page; enter your phone number or email address and a password of your choosing. Accept the privacy agreement and press “get verification code”. Complete the captcha by selecting the prompted images and you will receive a verification code from DoLynk cloud via text or email. Enter this verification code to verify your details are correct:

Resend

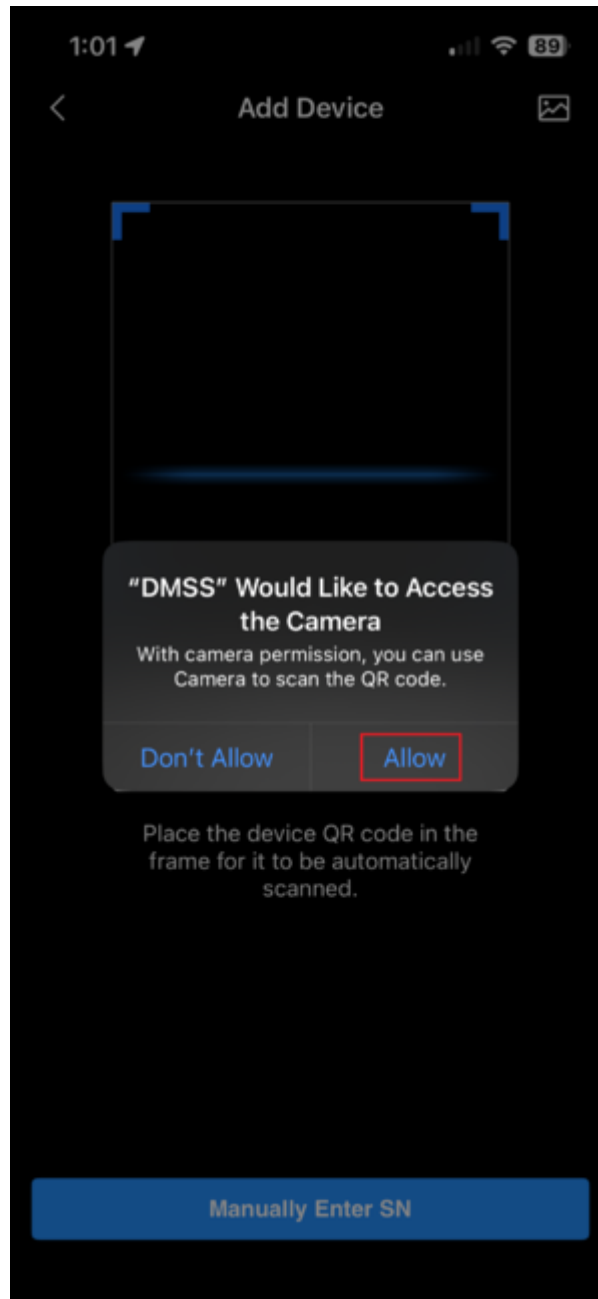

4. Once signed in; In the DMSS mobile app, navigate to the Home tab (bottom left) and tap the + in the top right corner, or the Add Device button if available:

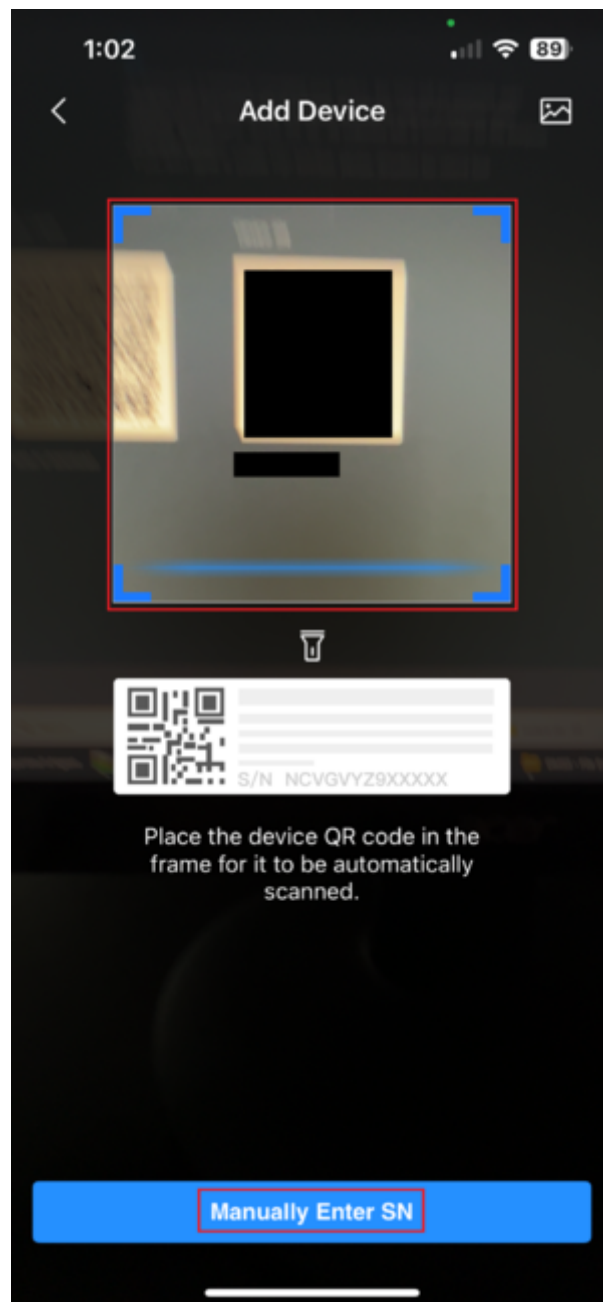

5. Select the QR Code option:

6. If prompted, be sure to allow DMSS to access your devices camera:

7. If you have the QR Code, place it in the frame of the scanner. Alternatively, you can select the option to Manually Enter :

8. After the scan completes it will auto-fill the serial number for you (or you will type it in here if you chose to manually enter). Do not enter a security code. Press Next:

9. Enter your device's admin password and press Next. Note: This is not your DMSS account password, it is the **admin** password for the device you are adding. For Android users, you may be prompted to select your device type before entering the Name and password for **admin**.

A screenshot of a mobile application's 'Security Verification' screen. The screen has a dark blue background. At the top, there is a status bar showing the time '1:03', signal strength, Wi-Fi, and battery level '89'. Below the status bar is a close button (X). The title 'Security Verification' is centered. Below the title is a password input field with the placeholder text 'Password' and a red border. To the right of the input field is a small icon of a crossed-out circle. Below the input field is a 'Note:' section with two numbered instructions. At the bottom of the screen is a large blue button with the text 'Next' in white. The word 'Password' is also visible in a smaller font above the 'Next' button.
