

Police receive a VERIFIED alarm and can dispatch immediately

Alarm signal & video recording sent via Mobile Phone network

Alarm Notifications are sent to a Central Monitoring Station where an operator sees the video of each alarm and reacts intelligently. Priority Police response is deployed if alarm video is verified.

AND

Video of alarm events can be on-sent directly to your web-enabled mobile phone  
*(subject to availability)*

Door Reed Sensors and other Accessories may be added wirelessly

Indoor / Outdoor All Weather Alarm Siren & Strobe

Videofied XL Panel Stand-alone (Pictured)

OR Videofied XT connects to standard alarm system

Outdoor Sensor / Camera is weatherproof & wireless - it contains self-illuminated Infra-red camera for true night time useability. Operates in temperatures -20C to 60C.

Indoor Sensor / Camera Motion sensitive Wireless Portable

Existing Alarm System can intra-connected to Videofied XT Panel

NO Codes, NO Keys, NO worries. Videofied wireless IP65 proximity badge reader arms and disarms your Videofied System using a single swipe of a tag.

Videofied utilises Military-grade wireless technology to enable secure two-way communication between the Panel and up to 24 other separate devices. This capability combined with up to 4 years of battery life and phone line free communications removes the weaknesses by which lesser systems are compromised.

The Videofied XL System has more capability than other security systems - with none of the flaws. Welcome to the new way of intelligently securing your peace of mind.

View actual video clips of intrusions at:  
[www.videofied.com.au](http://www.videofied.com.au)

1. Intruder breaks in.
2. Alarm triggered.
3. Camera activated.
4. 10 sec. clip recorded.
5. Video sent to Security.
6. Police alerted.
7. Intruder arrested.

## does YOUR alarm do this?

Videofied systems can be either wired into your existing alarm system, or be installed without wires or phone lines - a completely portable alarm system.

With up to 4 years battery life, the Videofied system works day or night, indoors and outdoors. With no AC power required, you are secure even in a blackout.

Videofied records video only when the alarm is activated, ensuring your privacy. Video is immediately sent to the Control Centre where our operators can listen and speak two-way to the intruder - or verify a false alarm. Recorded video allows for immediate Police despatch: no more false alarms.

The Videofied XL panel is armed and disarmed with a unique Fob - no complex codes.
